

**PSMA PET/CT Imaging Is Here!
Pylarify (Piflufolastat F 18)
Is Now Available at
METRO REGION PET CENTER**

Metro Region PET Center will begin performing Pylarify PET/CT imaging for prostate cancer patients with either of the following indications:

- Suspected metastases in patients who are candidates for initial definitive therapy.
- Suspected recurrence based on elevated PSA level.

Initially, access will be limited to Medicare and Medicare Advantage recipients, as well as self-pay patients, until Pylarify is assigned a CPT code and the scan is approved by commercial insurances.

Note that insurances secondary to Medicare may not yet cover this procedure. We will verify your patient's insurance benefits and notify them of any financial responsibilities.

When ordering a Pylarify scan, please fax your patient's referral and the following documents to us at 703-698-5171:

- Office notes and clinical information including the reason for ordering the study. Please include ICD-10 codes.
- Patient's contact and insurance information

For further information or questions regarding coverage, please contact:
